## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-27 are allowed.

The following is an examiner's statement of reasons for allowance: The primary reason for the indication of the allowability of claims 1-27 is:

Regarding claims 1-27, the prior art does not teach or fairly suggest in combination with the other claimed limitations a modular electrical device comprising a housing, a frame member selected from a plurality of frame member; an electrical wiring assembly chosen from a plurality of electrical wiring assemblies, each of the plurality of electrical wiring assemblies having a different functional configuration; a set of terminal contacts selected from a plurality of sets of terminals contacts, each set of terminal contact being matches to accommodate one of the plurality of terminal wiring assemblies; and the housing configured to be disposed within the first opening of a wall plate.

This limitation is found in claims 1-27, and is neither disclosed nor taught by the prior art of record, alone or in combination.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Response to Arguments***

2. Applicant's arguments, see the Amendment filed on June 23, 2005 with respect to claim 1 have been fully considered and are persuasive.

In response to the applicant's argument the Examiner agrees that neither McKissc (US 3,879,101) nor the cited prior art teach, disclose or suggest a modular electrical device comprising a housing, a frame member selected from a plurality of frame member; an electrical wiring assembly chosen from a plurality of electrical wiring assemblies, each of the plurality of electrical wiring assemblies having a different functional configuration; a set of terminal contacts selected from a plurality of sets of terminals contacts, each set of terminal contact being matches to accommodate one of the plurality of terminal wiring assemblies; and the housing configured to be disposed within the first opening of a wall plate.
